

Naturally Sustainable

NEWSLETTER 4

The project partners gathered in Helsinki, November 01 to 03, for a training and transnational meeting, which was necessary to fine-tune the various outputs produced and results obtained.

From mid-January they will enter the focus group and output testing phase, involving various actors and stakeholders at multiple levels.

Meanwhile, the platform has been integrated with the materials produced so far, that will be translated into the official languages of the project (English, French, Italian, Latvian, German, Finnish) www.naturallysustainable.global

These materials include workshops that illustrate the various SDGs and are already usable by anyone interested in offering this activity to students as well as contain numerous games and tests regarding the topic of sustainability and sustainable lifestyle.

Upcoming results will also include the creation of a new video that will illustrate and make the materials produced more usable.
