

## DWC Newsletter 4: September 2023

The Erasmus Plus project "Towards Variable-Access & Digitalization of Wellness Courses in VET", DWC, was launched in Brescia, Italy, in February 2022.

Since then, the 6 partners involved in the project are working on the design of a course on Aesthetics and Cosmetology, so that, through collaboration with professionals in the sector, teachers of vocational training courses, can create new digital material for distance learning.

The project partners are developing the content of the two tangible outputs:

- **An open-access interactive pedagogical programme** with adaptable approaches; didactic resources and learning resources for aesthetics and cosmetology trainers, through a digital manual (Ebook) addressed to vocational training centres.
- **Five digital didactic chapters through an interactive Ebook**, for the initial vocational training programmes of Aesthetics and Cosmetology, with their corresponding training modules.

We have just finalised the pre-testing phase, which started in April 2023. During our next project meeting we will start with the fine tuning, in order to proceed with the translation of all materials in all the partner languages.

Our 5th International Project Meeting is scheduled to take place in Helsinki in September 2023.

The project resources will be based on digital technology, and will be open source, i.e. freely downloadable and available in 6 languages.
