## FIFTH TRANSNATIONAL MEETING FOR DIVO PROJECT IN FINLAND, HELSINKI

The project DIVO (Digital Evolution - The Journey) is an Erasmus+ project building an AR game that aims to develop the basic digital capacity and abilities of low skilled adults in the digital world. The project held its 5th transnational meeting in Helsinki on 21-23 August 2023, where the last version of the game was tested and dissemination, administration, reporting and other measures were discussed. The partners were happy to spend a few days in mostly sunny Helsinki, visiting Suomenlinna island and trying some Finnish food at the market square as well as Zetor Restaurant. Some even decided to have a sauna and swim in the Allas Sea Pool warm and cold pools!

DIVO project is a partnership between France, Finland, Turkey, Spain, Sweden and Lithuania and the final AR app will be available in these languages and English.
