

DWC stands for "**Towards Variable-Access & Digitalization of Wellness Courses in VET**".

Since February 2022, the 6 partners involved in the project are working on the design of a course on Aesthetics and Cosmetology, so that, through collaboration with professionals in the sector, teachers of vocational training courses can create new digital material for distance learning.

The project partners have developed the content of the two tangible outputs:

- **An open-access interactive pedagogical programme** with adaptable approaches; didactic resources and learning resources for aesthetics and cosmetology trainers, through a digital manual (eBook) addressed to vocational training centres.
- **Five digital didactic chapters through an interactive eBook**, for the initial vocational training programmes of Aesthetics and Cosmetology, with their corresponding training modules.

All the materials have been translated in all different partner languages: English, French, German, Italian, Finnish and Spanish. Now the materials are ready, we have started with the testing phase by external organizations. We will be testing until the end of September 2024.

In September 2024, we have had our 7th Transnational Project Meeting, that has taken place in Toulouse. During this meeting, we have started fine-tuning materials and getting everything ready and uploaded for the final conference.

The Italian Final Conference will take place in Brescia on December 4th 2024, followed by Conferences in France, Germany, Finland and Spain.

The project resources will be based on digital technology, and will be open source, i.e. freely downloadable and available in 6 languages via the DWC Website, DWC Facebook and LinkedIn pages and the DWC YouTube Channel.
