

NAVI-MIG's 4th NEWSLETTER

TPM IN ZARAGOZA 10-11 JUNE 2024

The year of 2023 was a year full of new outcomes for NAVI-MIG, but 2024 has not been less. We navigated through Helsinki, Leuven, Porto and finally Zaragoza, where our final Transnational Project Meeting has been held. The unmistakable strong wind of the city, el Cierzo, didn't stop the partner from enjoying and exploring the charming capital of Aragon region and set a step further to the project progress. For two days we discussed the state and finalization of PR2, PR4 and PR5. Meeting again, this time for our last TPM, was an opportunity to strengthen our network and come to a conclusion for our outstanding project results. This meeting ended up being an incredible opportunity for us to check our progresses and plan the last steps to carry out before the project's end.

TPM IN ZARAGOZA 10-11 JUNE 2024

Besides, we had the great opportunity to discuss creative ideas to overcome these obstacles and to effectively contribute to the further integration of migrants in the European Union.

Although this may seem to be the last part, it doesn't mean this would stop spreading our results. As a matter of fact, we focused on refining our online tools and results, looking forward to making it available to everyone as soon as possible!

PROJECT MULTIPLIER EVENTS

The understanding and sensibilization of our mission about migration and social inclusion is something we cherish a lot and, as a part of our project dissemination, we organized diverse Multiplier Events in the different partners' countries (Austria, Estonia, Spain, Cyprus, Greece, Finland, Portugal and Belgium) in order to spread knowledge about our project results and disseminate them to our target groups.

the European Union

Representatives of local municipalities, of NGOs, of inclusion and integration programs, participants of the piloting and Stakeholder Feedback Sessions, interested migrants and interested members of the general public have been invited to join these events, which have lead to a great success to our project implementation.

This is what lies at the core of our minds: spreading knowledge and creating networks that help up to better face such challenges like the one of our project.

Finally, collaborating from different countries has made us possible to even increase our results and get more excited about finalizing our project and delivering our amazing results!
