

BEACH

INSTRUCTIONS

**DO NOT ALLOW CHILDREN TO GO TO THE BEACH
WITHOUT ADULTS**

SUPERVISE CHILDREN NEAR WATER!

The child can drown in a few seconds, silently.
Stay in the water near the child so that the child is
between you and the beach.

TEACH THE CHILDREN

that you should not go to the water or near water without an adult.

WHEN A CHILD LEARNS SWIMMING

armbands or floating swimwear can be used for training.
However, remember that they are not a means of rescue,
nor shall an unskilled child be left unattended.

**MAKE ALWAYS SURE THE BEACH IS SAFE TO
SWIM OR JUMP**

Every year, people who know how to swim well also drown in
Finland. Drowning is one of the most common causes of
accidental death in children.

Please take care of your own and your children's safety.
