

Proftest Syke is accredited proficiency test and interlaboratory comparison organizer ([PT01](#)).

Interlaboratory comparisons are effective means to externally evaluate the laboratory's performance.

- Proftest Syke provides a wide range of interlaboratory comparisons for different sectors, for example related to environmental measurements. As proficiency testing experts we offer our services as consultants and trainers, and we develop our services continuously to fulfill the needs of the evolving field of analytics.
- The Finnish Environment Institute (Syke) has acted as the national environmental reference laboratory since 2001 according to the Finnish Environmental Protection Act (527/2014). One of the main tasks of the reference laboratory is to organize proficiency tests and other intercomparison tests.
