

# FlowCAM

## Imaging particle analyzer

Target organisms: phyto- and micro-zooplankton.

Size range: ~10-1000  $\mu\text{m}$

FlowCam can quickly take colored pictures of particles in the water, providing fast enumeration and characterization particles (shape, size, color).

- Bench top instrument
- Peristaltic pump
- Can be used in auto imaging or trigger mode (particles containing chlorophyll a or phycoerythrin)
- Can be used for live or fixed material
- Link to more technical details and specifications on the [manufacturer's web page](#)
- Contact persons Kaisa Kraft, Lumi Haraguchi (firstname.surname@syke.fi)
