

# RV Aranda

## Multipurpose research vessel

Aranda is a modern, ice-reinforced, multi-disciplinary research vessel for marine chemistry, biology, physics and geology. The well-equipped, FINAS accredited laboratories and advanced computer systems facilitate sample treatment and data analysis under way.

- Complete hydrography and nutrient analysis capacity
- CTD Seabird SBE911plus, with SBE32 Carousel Water Sampler for twelve 5 l Niskin bottles, temperature and oxygen sensors, fluorometer (owner FMI).
- Wide selection of pelagic and benthic sampling gear
- Towed instruments, e.g., Multi-Net, Aqua-Shuttle
- Complete hydroacoustic suite: R2Sonic shelf depth MBES, Edgetech SSS, Sub-bottom profiler, Meridata system
- Pelagic trawl to 100m, Simrad EK60 and EK80 fish echosounders (owner LUKE)
