

# Mechatronics workshop

Hardware, software and complete systems

Services for designing and building hardware as well as software systems for measurement and metrological research.

## Services:

- System design, architectures and programming
- Construction, customization and repairs for environmental measurement systems
- From small parts to vehicles and complete systems

## Facilities:

- Teklab Electric workstation, 3D-printing, Waterjet cutting, Lathe and milling machine
- Hall space for boats, trailers or other larger systems
- AutoCAD for design
- Contact: [mekatroniikka@syke.fi](mailto:mekatroniikka@syke.fi)

## Application areas:

Biota

Water

Soil

Oil

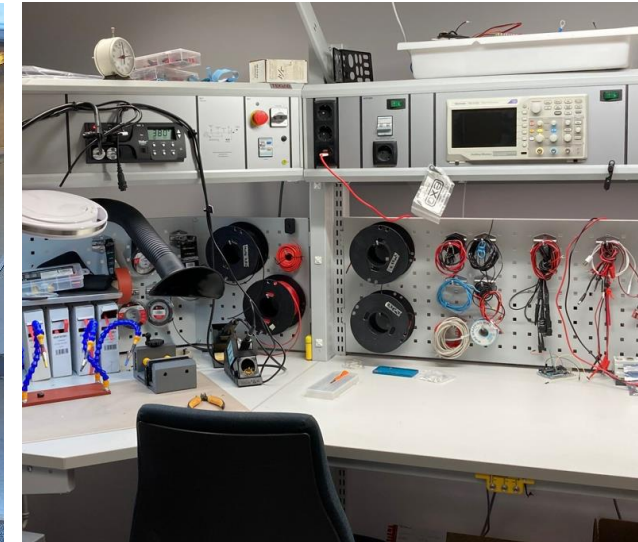

Radiation
