CGI Profio360

Modernization Journey

Marko Myllymäki
CGI

FinPUG 23 May 2019

CGI at a glance

Founded in 1976

43 years of excellence

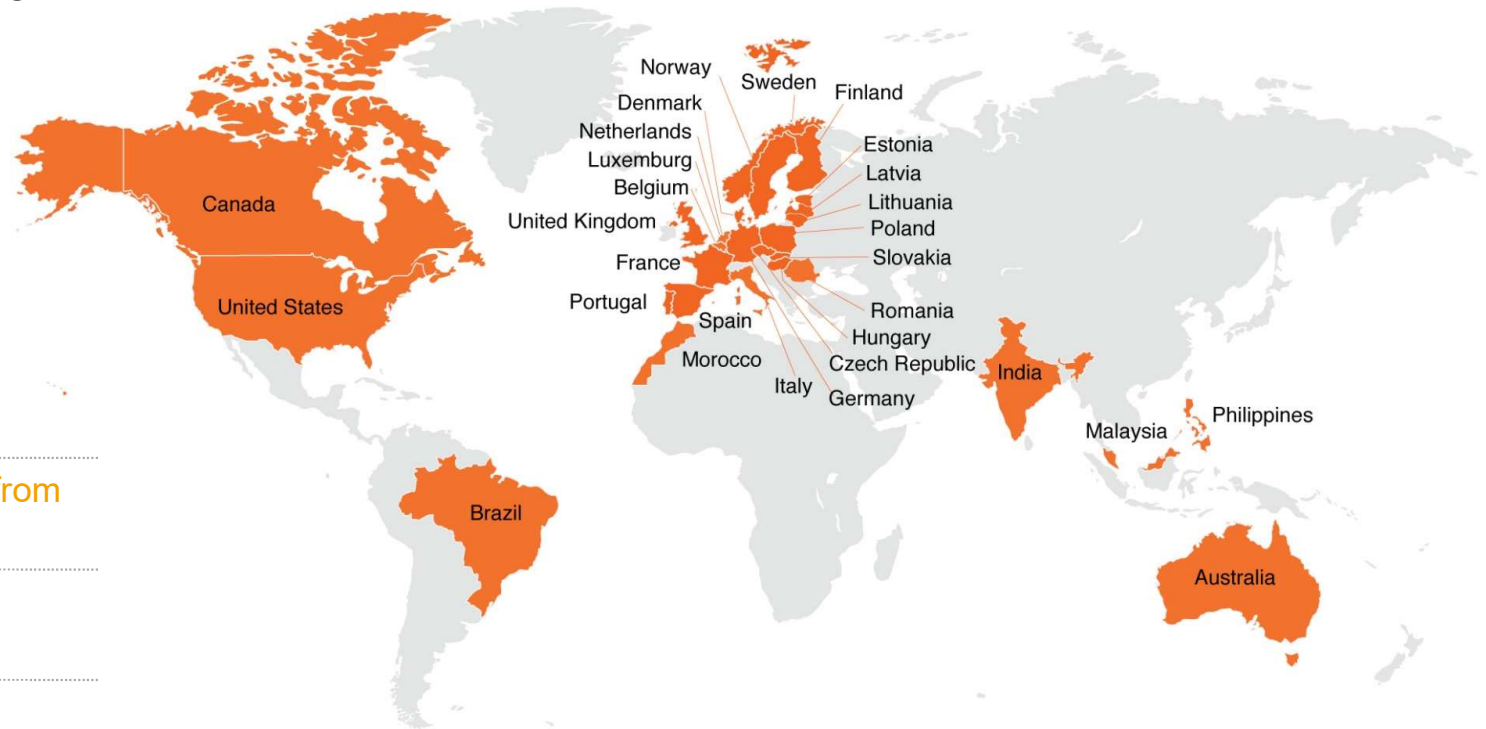

CA\$11.5 billion
revenue

76,000
consultants

400 locations in
40 countries

5,000 clients benefiting from
end-to-end services

175 IP-based solutions
serving 30,000 clients

CGI in Northern Europe

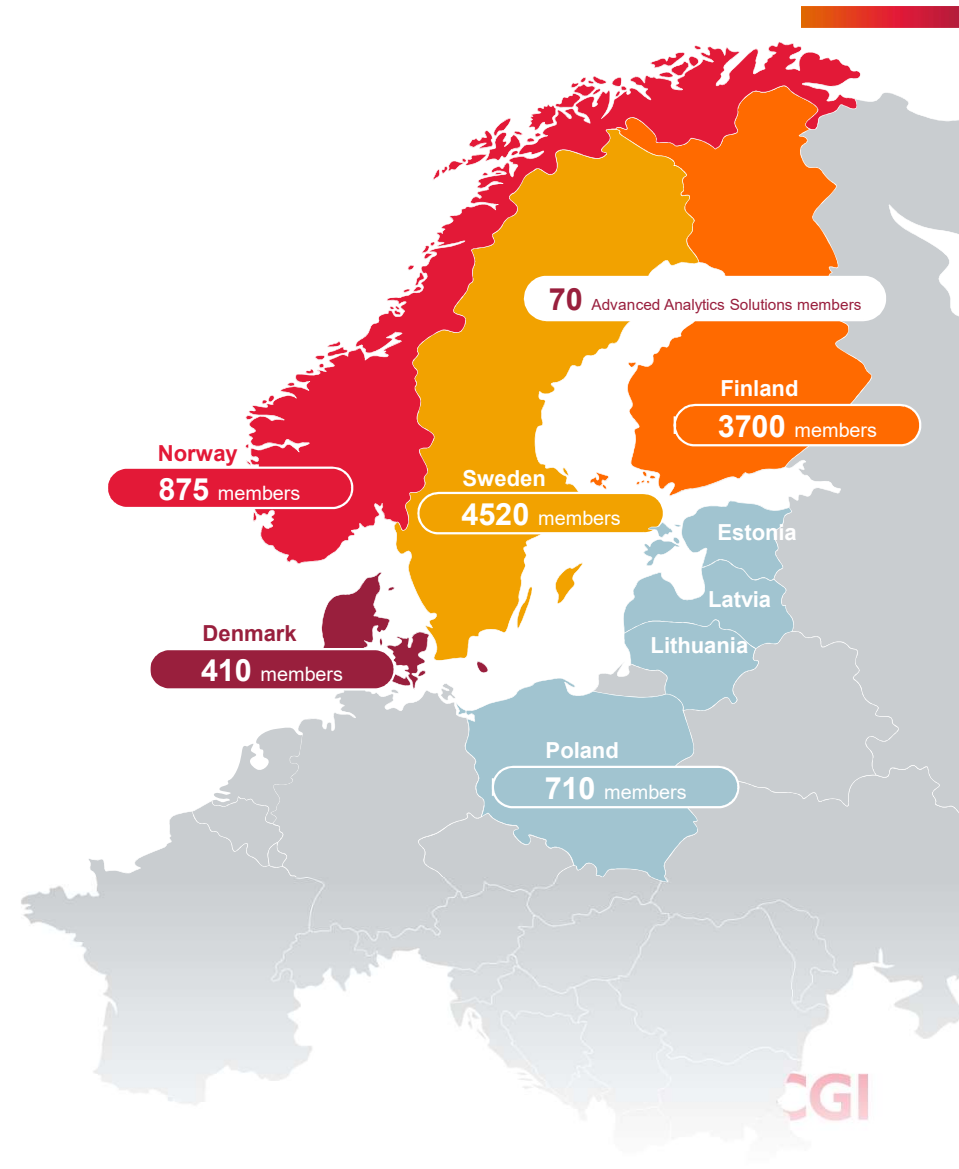

Client Proximity

10 000 members
8 countries in 6 BU's
64 offices

Center of Excellences:

- Security
- Agile Development
- Advanced Analytics & AI
- Service Design

CGI in Finland

3 700 employees

18 locations

3500 clients

CGI and Progress in the Nordics

1000+ companies 100 000+ daily end-users

- Profio360 (ERP, Construction & Manufacturing) 
- PC360 (Insurance) 
- Powered (ERP, Manufacturing) 
- Gemini (ERP for Healthcare) 
- Populus (HR, Payroll) 
- Winsure (Insurance) 
- IT4Cargo (Logistics & Transportation, Custom) 
- CGI Graphical, G10, eGD (printing and publishing) 

- Ratti (Vehicle insurance, OP-Pohjola) 
- Winlife (Life insurance, HenkiFennia) 
- TWIN360 (Treasury and Asset Management)  
- Biochemistry LIMS (Healthcare) 
- Blood bank (Healthcare) 
- Pathology LIMS (Healthcare) 
- Genetics LIMS (Healthcare) 

40

Years of development
and experience

200

Customer companies and
organizations streamline their
operations with Profio.

10+

International solution
In use in more than 10
countries

2 000

Profio Solution being used
in 2000 sites (factories or
construction sites)

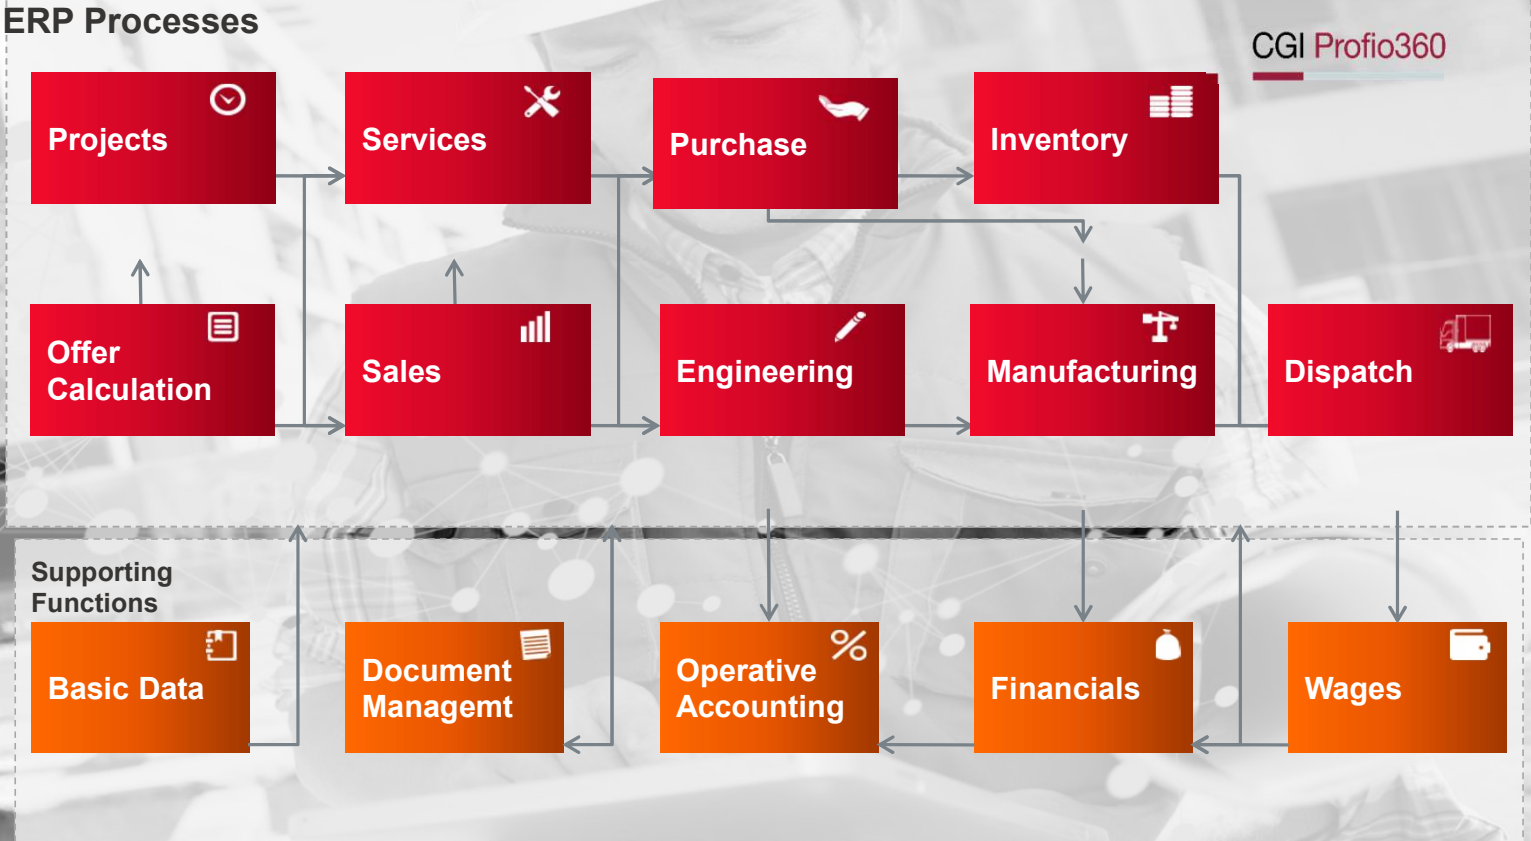

70

Customer service
Provided by 70 experts

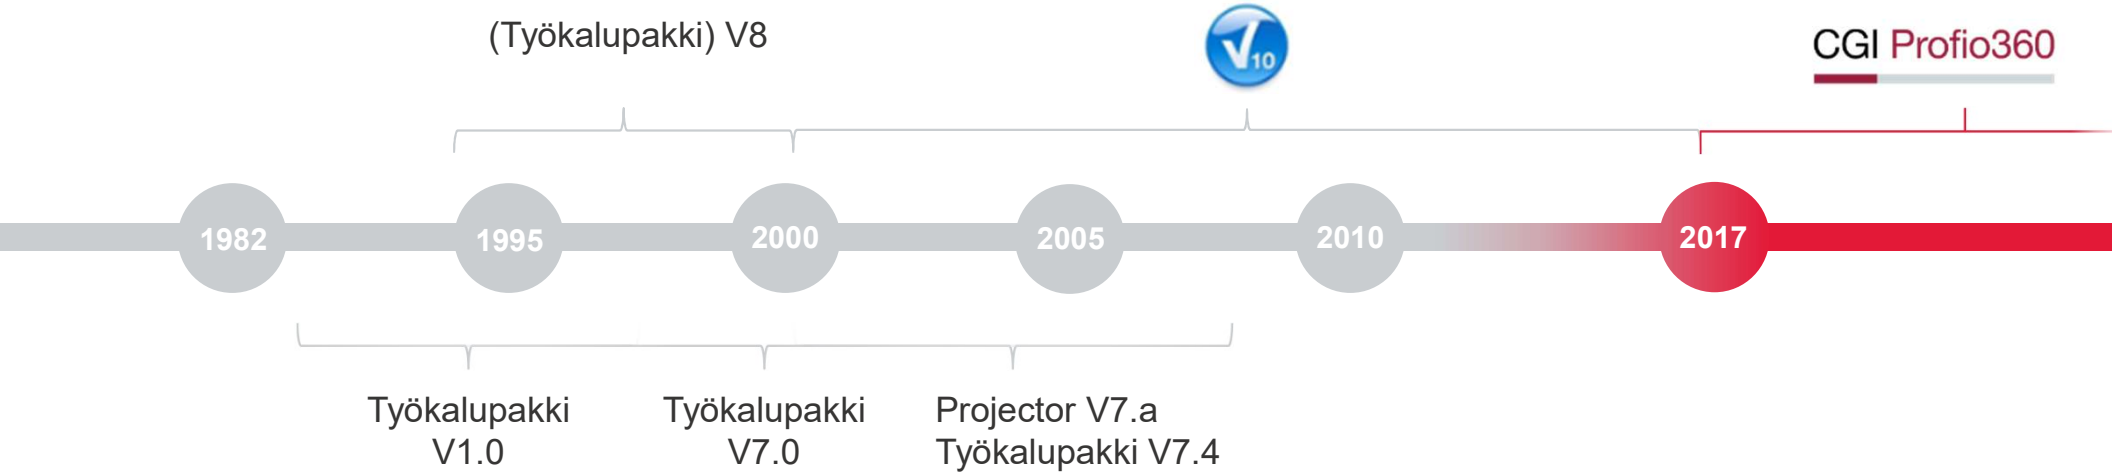

10 000

Profio Solution
used by more than
ten thousand individual users.

CGI Profio360 ERP

Long term commitment to all stakeholders

Four years ago...

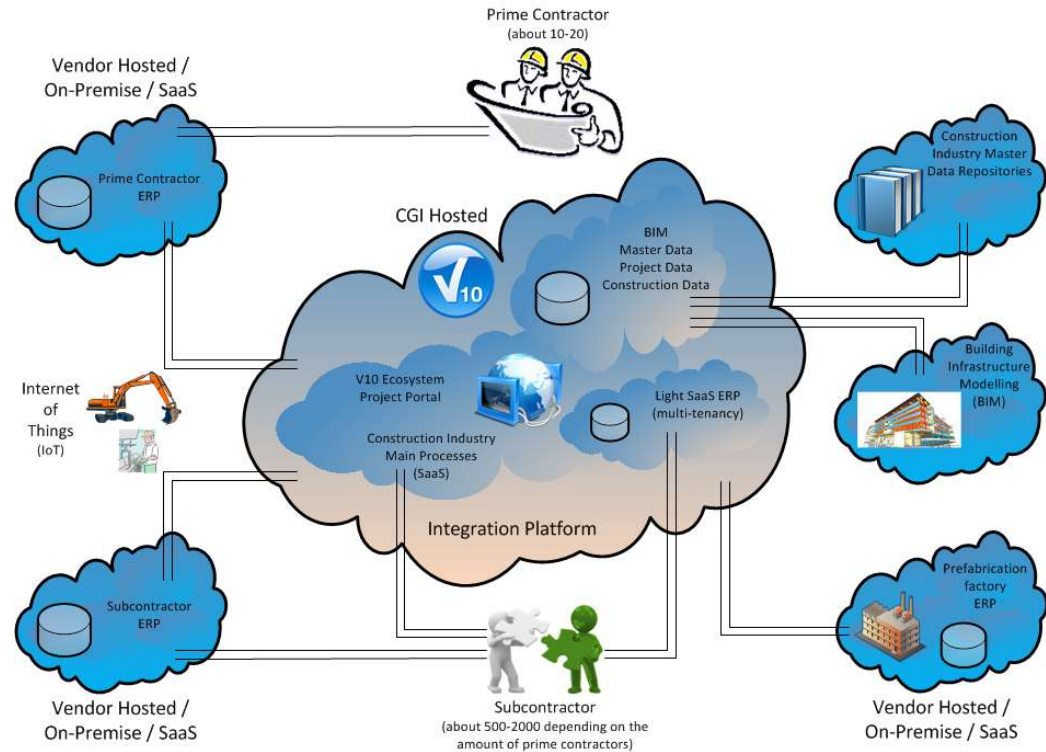

- Mainly Windows client only
- Only a few dedicated web and mobile solutions
- All development, sales, deliveries and client support was made by the core team with less than 100 members
- Restricted application
- Dated UI
- Not the best possible UX

→ Something had to be done to be able to stay in business

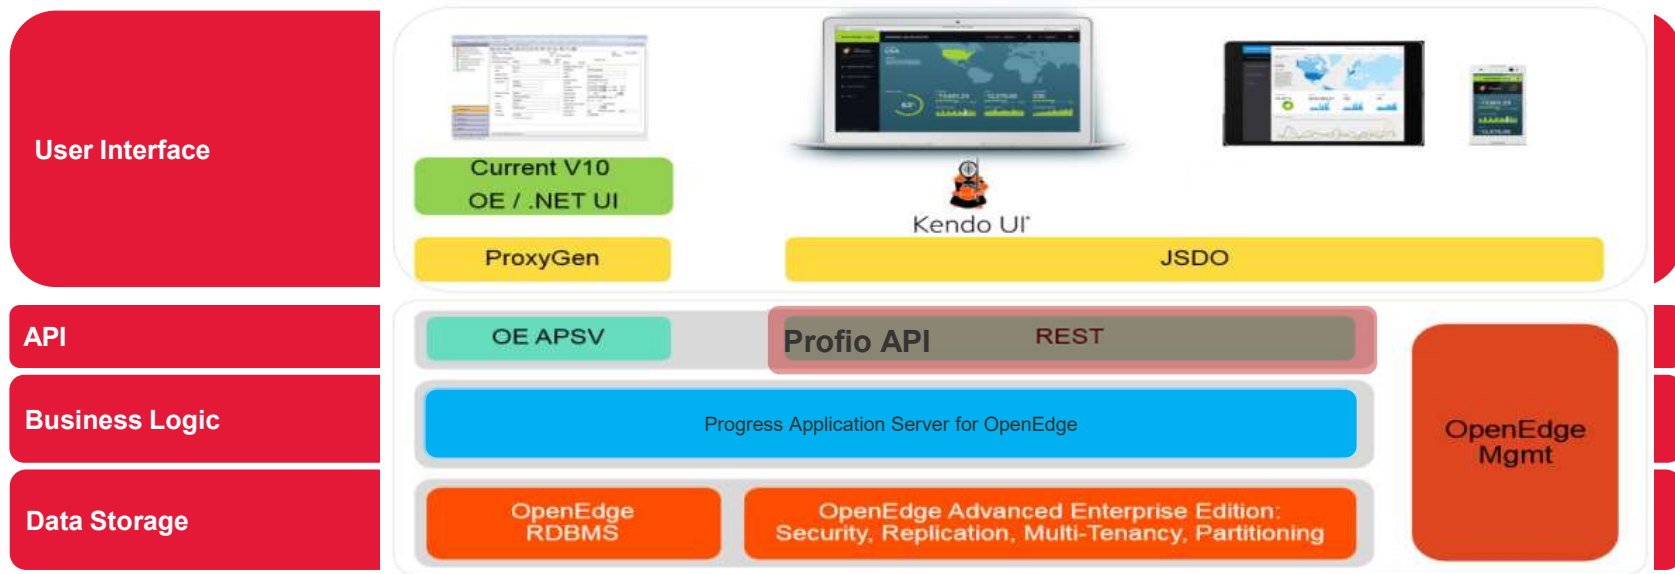

What did we do?

- We had a vision
- CGI provided funding
- Progress provided the tools
 - Project Garage
 - PASOE
 - Kendo UI

→ We are back in business stronger than ever

Modern Architecture

To be able to strive for our vision we had to

- Select solid technology stack
- Refine the architecture and adopt separated layers
- Implement Profio API

Key elements for application framework

Dynamic 1

Dynamic UI
Easy to customize

2 **Modular**

Small, reusable modules
Menus and screens built of interconnected modules

Productive 3

Easy to develop and maintain
Easy to deliver

4 **Effective**

Best possible performance

Framework features

Meta data repository

Definition of application structure and behavior.
Enables a **dynamic application** that can be modified in many ways without any programming.
Screens can be built of several individual, **interconnected modules**.

Standard template

Base for each **individual module**.
Offers a lot of **common functionality** for UI screens out of the box.
Enables **great productivity** and helps to maintain **high quality**.

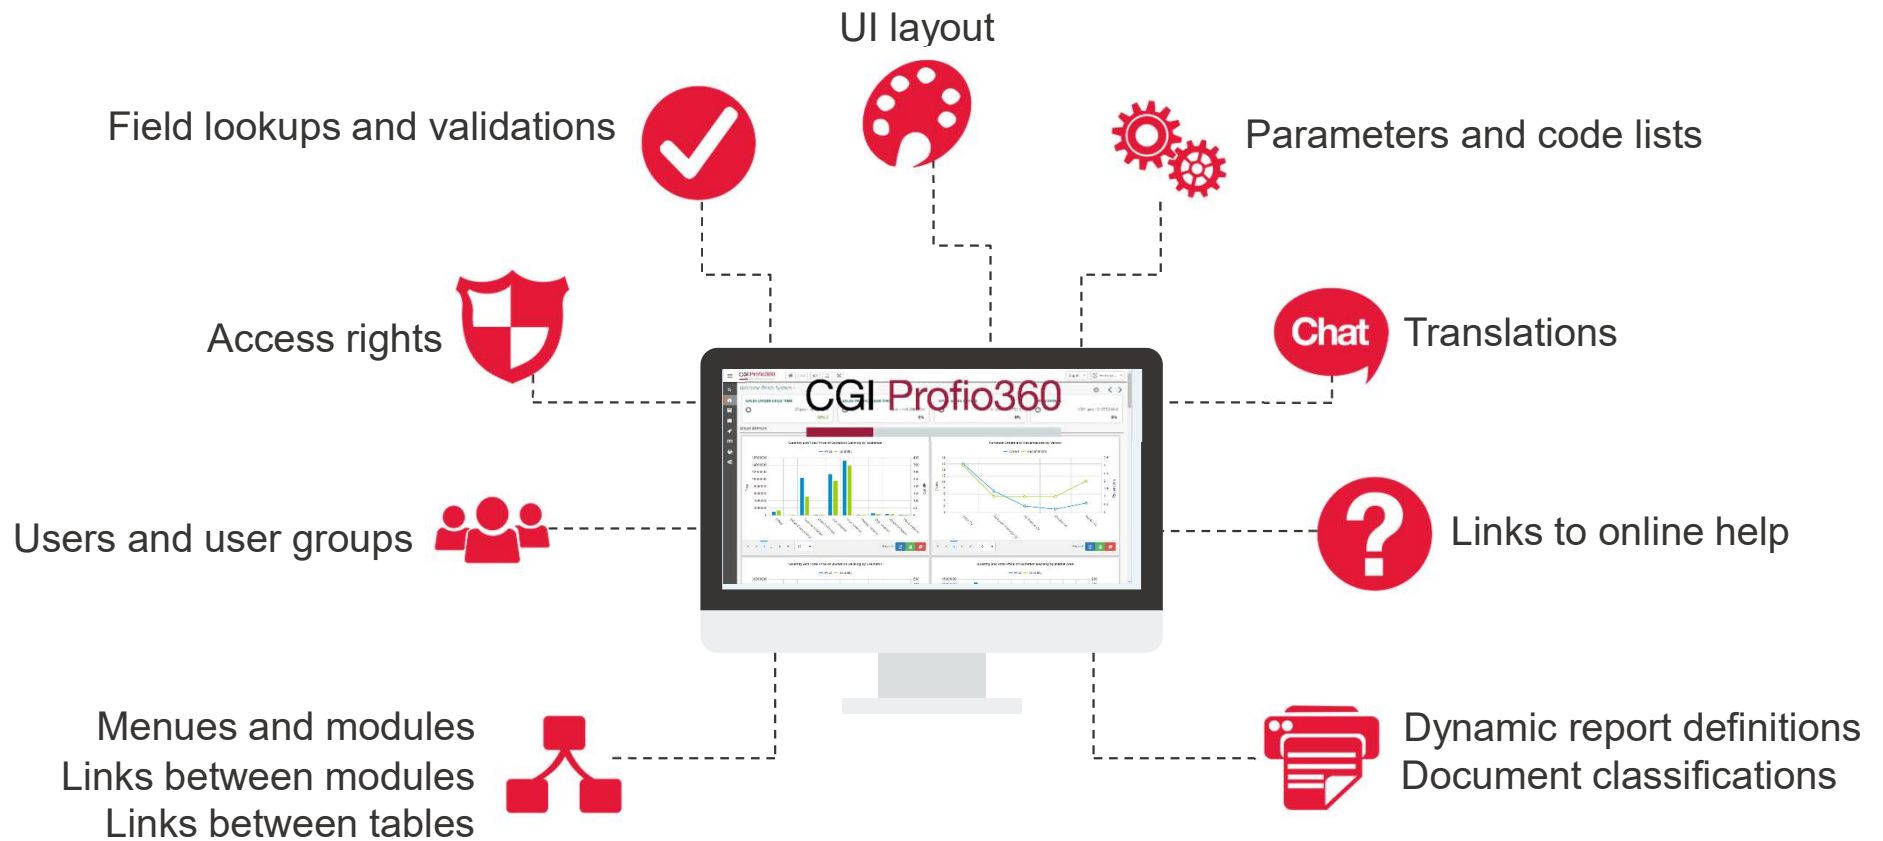

Service modules

Offer a lot of **common services** for other modules and **access to meta data**.
Enable smaller, **more efficient** r-code.
Memory-resident for **fast access**.

Change bulletins

Method for combining meta data, program changes and change descriptions as a package for an **easy delivery** to our customers.
Early form of DevOps and CI/CD.

Meta data repository

Previous modernizations (2000-2017)

AppServer

Created technology for making a thick client AppServer enabled so that temp-tables are used instead of direct database connection

WebSpeed

Created technology for generating html/javascript dynamically from template based programs (same .w for client and web)

.NET UI

Added support for embedding .NET panels/forms inside the application and created the main menu, toolbars etc. with .NET components

Framework modernization - new vision

- Our vision for the framework was enhanced by new requirements:
 - Separate the business logic from the (very thin) UI
 - Offer an API to our business logic for integrating other systems etc.
 - UI independency: support many different platforms, client types and form factors
 - Use the common meta data whenever appropriate
 - Modern, top notch UI/UX

Framework modernization – results

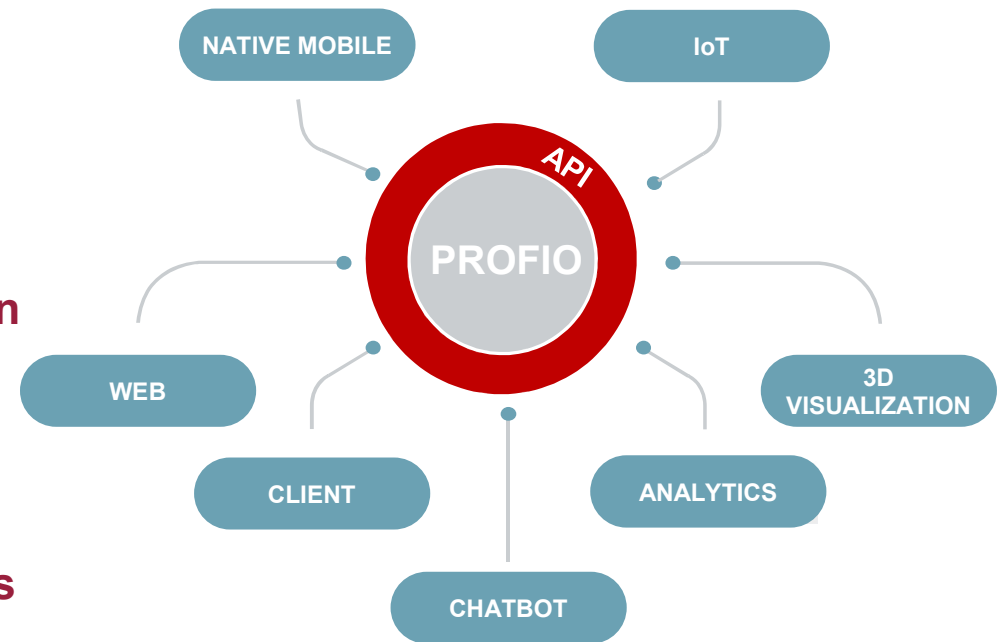

- UI and business logic have been separated by creating an **API layer**
 - REST
 - ABL Service with REST transport
 - JSON as the data format
 - Static services + a dynamic service for general usage
 - PASOE
 - A natural choice for offering a REST based API
 - Excellent performance and scalability
 - Spring (form based) authentication with support for multi-tenant databases
 - Serves as an API to third parties
- New **UI templates** for web front-end
- New (back-end) **service modules** for session management, filtering, translations etc.
- Even **more meta data** is now stored in the repository, including:
 - Additional properties of screen layouts (better support for adaptive web UI)
 - Support for additional UI element types (carousels, charts etc.)
 - API services related to a module

Framework modernization – future plans

- The highest priority is to continue adopting DevOps principles and methods
- Traditionally, we have had
 - In-house built version management tools
 - Change bulletin mechanism for deliveries (including quite a lot of manual work)
- Currently we are
 - Unifying development methods and tooling for both client and web development
 - Adopting Git and CI/CD pipeline for
 - Automating builds
 - Automating tests and code validations
 - Reducing manual work
 - Increasing quality

Where are we now? Multi channel Profio

- **Client** functionalities are still enhancing
- Modernized **web** UI for specific modules (purchasing, project management, sales, offer calculation, cost monitoring)
- **Profio Mukana native mobile application** for Android and iOS
- **3D visualization** linked to the context and features of Profio (data modelling)
- **Profio as a data source to Analytic tools** like MS Power BI
- Agile way of integrating **value added services and tools to Profio** (IoT, ChatBot,...)

Benefits of API based development

Business logic and APIs

- Separated development and testing

UX/UI design

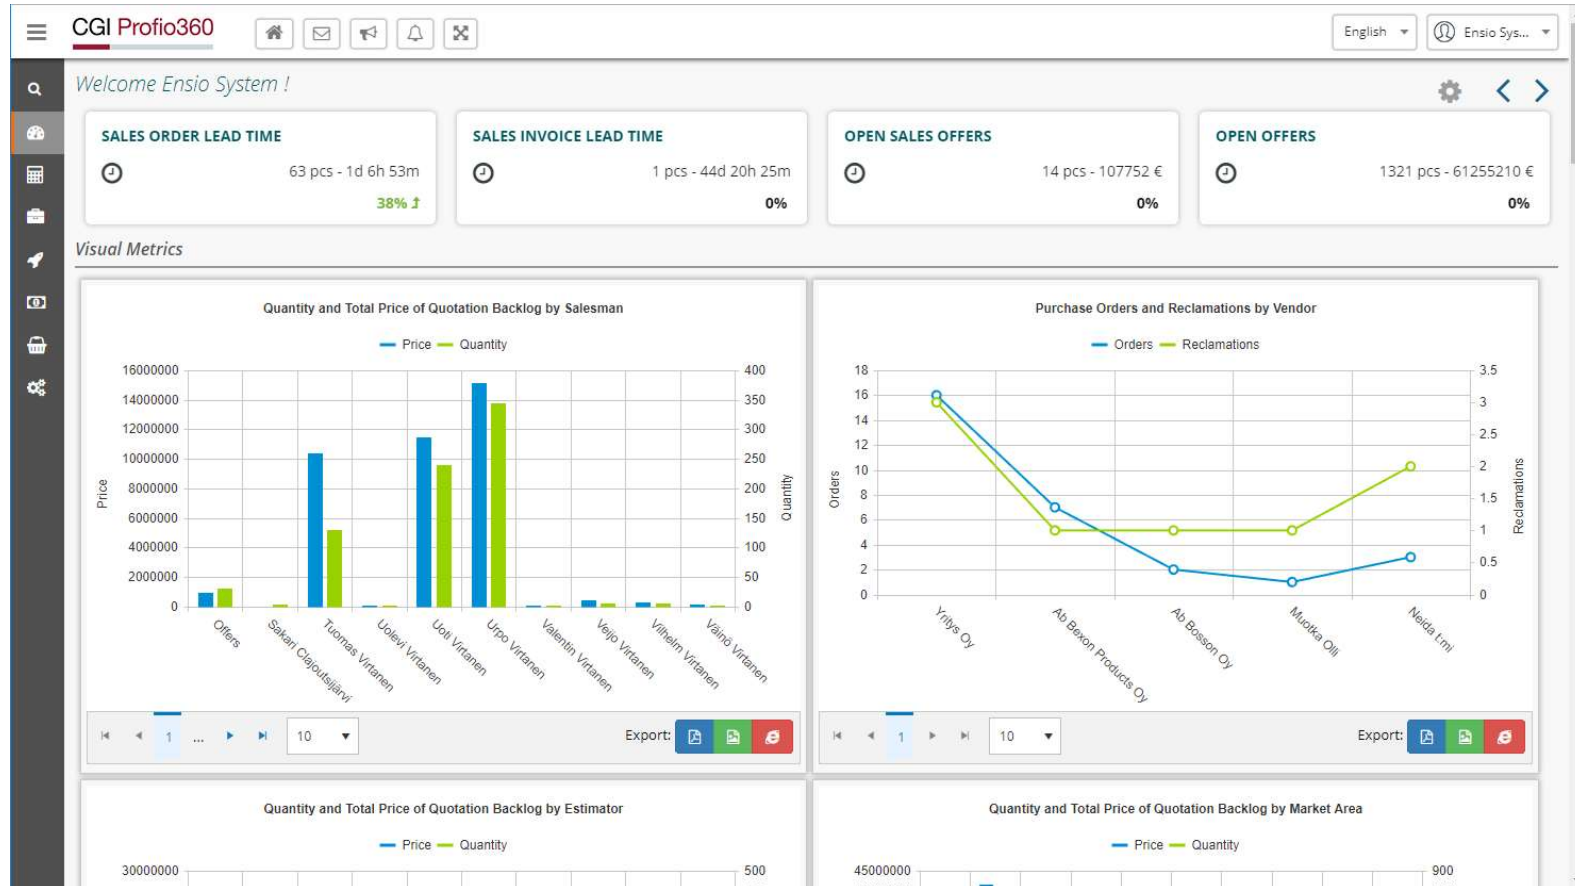

- Mandatory UX/UI design
- Development can start only based on approved design

UI development

- Development is done for the device to best fulfill the requirements of end user's role (web, mobile, Windows client, ...)
- Development resources outside Profio core team can be used

TARJOUS CGI0493 1(2)
11-04-2018

Demosiakas
Kauppatie 10
90650 OULU
Suomi

Työkohteen osoite:

Kiitämme tiedustelustanne ja tarjoamme Teille kohteeseen seuraavat työsuoritukset:

1. TARJOUKSEN SISÄLTÖ / LAAJUUS JA VELOITUS

PIHATYÖ/IISALMI

	Yksikköhinta	Yhteensä	EUR
Maanrakennus	0,00	0,00	EUR
Maansiirtotyöt	40,00	800,00	EUR
Perustustyöt	75,00	150,00	EUR
Päälystys	35,00	700,00	EUR
Kalliomurske 3- 6 MM	17,00	51,00	EUR
Astatti	12,00	240,00	EUR
Kaivinkone	80,00	160,00	EUR
Suunnittelu/valvonta	40,00	40,00	EUR
Special	500,00	500,00	EUR
Cottage	1200,00	1200,00	EUR
EDELLÄMAINITUT TYÖT YHTEENSÄ			
Sum (24%)		3.841,00	
Moms 24 %		921,84	
TOTAL		4.762,84	

2. TARJOUKSEN VOIMASSAOLO

Tarjouksemme on voimassa yhden (1) kuukauden tarjouspäivästä lukien.

Asiaa hoitaa meillä:

Ensio System 123455
v10@v10.cloudapp.net

Toivomme tarjouksemme soveltuvan Teille.

Profilo Analytics

CGI Profio360 Product strategy

Multi channel Profio

We'll create **Profio platform** with versatile use of **API**. Easy to sell, easy to buy.

To integrate data in Profio (purchasing, sales, manufacturing and sites) seamlessly to analytic tools like MS Power BI

Profio Mukana implementation continues

To utilize **CGI competencies** by providing rich **API**.

3D visualization as part of Profio to support the needs of both construction and manufacturing industry

Improved UX for client as well

CGI Profio360 Product strategy

Improved UX to all our clients

Deploy and utilize the features of new **OpenEdge release 12.**

To utilize **service design** in all Profio development.

Improving **Profio Client** UX with modern components.

Highlight the role of **module owners.**

Utilizing the synergy of **G10 and Profio** in product development.

Contact us to continue the conversation.
