

AO Trauma Course Basic Principles of Fracture Management

April 17-19, 2024

Porvoo, Finland

Language: Finnish

Goal of the event

The AO Trauma course Basic Principles of Fracture Management teaches fundamental principles and current concepts in the treatment of injuries, incorporating the latest techniques in operative fracture management.

The AO Trauma Basic Principles course is the initial step along the path of lifelong learning in the area of operative fracture management and the main focus of this course lies in the basic principles of fracture management.

Target participants

Doctors in surgical training but is also open to those who are interested in furthering their knowledge and skills in operative fracture management.

Learning objectives

- Discuss the concepts of stability, their influence on bone healing, and how to apply implants to achieve appropriate stability.
- Plan a treatment based on assessment, imaging, classification, and decision-making.
- Apply reduction techniques in fracture management with attention to the importance of the soft tissue.
- Use appropriate fixation techniques to treat diaphyseal and simple (peri)articular fractures.
- Evaluate and recognize special problems related to fractures in the immature skeleton, pelvic injuries, osteoporotic fractures, postoperative infection, and delayed union and/or nonunion.
- Plan the initial treatment of the polytraumatized patient.
