_++	· normal	□ + – carrier	□ – – af	fected	
Utrecht,	P.A.J. Leegwater				

## Instructions:

Please request your veterinarian to verify the identity of the dog by the chip number, and to collect and mix 2 to 4 millilitres of blood in an EDTA tube.

The name of the dog has to be marked on the tube.

The blood sample can be sent at room temperature by regular mail in an "airfoil" envelope.

For every single dog one form has to be filled out and mailed together with a copy of the pedigree and the blood sample(s).
