## A THIRDPLACE IN PÉRIGORD

28/10–09/11

PAT / ENVI 10 vols 18+

### PROJECT

Nestled in the hollow of a green valley, the town of St Amand de Coly is located in the heart of the Périgord Noir, a territory rich in history! Composed of two former municipalities that decided to join forces to form one. The commune is home to the Ecocycle association, a third-party organisation that is developing a participatory activity project in the commune of Saint Amand de Coly and the surrounding area. These activities are strongly influenced by concerns about climate change. After major renovation work, a building made available by the local authority is now coming into being.

You will help the association and its volunteers to prepare the building to welcome its members. You'll discover the local people's sense of welcome and the charm of the countryside and heritage, as you work with the other volunteers and the organisers to organise your programme of activities.

### WORK

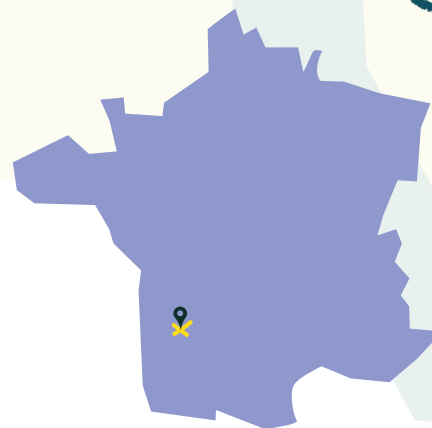

The mornings of the 2 weeks will be devoted to renovating the association's premises. The programme includes you make a work on the finishing touches to the building, which will involve painting: smoothing out the paintwork in the various rooms where need has been identified, sanding the beams and/or painting the right depending on the wishes of the commune on the right-hand dormitory. You'll then build the shelving for the laundry room, library, communal coffee room or offices, using as much as possible of the materials extracted from the deconstruction of the building.

### ACCOMMODATION AND FOOD

You will be welcomed at the Vieux logis de Saint Amand. Sleeping accommodation in rooms of 2 to 3 people. Meals will be cooked and eaten collectively, so you can take it in turns to prepare some tasty dishes, so come along with your own recipes.

### LEISURE ACTIVITIES

During your stay, you will have the opportunity to participate in site visits, nature activities, you will build your own entertainment program with the animators and the other participants. We favor a discovery of the territory and these actors over consumption activities.

**Location:** Coly – St Amand is located in Périgord Noir, 10 km from the caves of Lascaux, between Périgueux and Brive.

**Closest train station:** Reception on the day of arrival at the end of the afternoon at Condat–Le Lardin station.
