Let yourself be absorbed by the charm of Porto

SSIEM 2024 is about Exploring New Horizons

Welcome to the Annual Symposium of the Society for the Study of Inborn Errors of Metabolism in lively Porto! We are delighted to have you joining us as we embark on the journey of “Exploring new horizons” in IEM.

From groundbreaking research to pioneering models and innovative therapies, this symposium aims to challenge our knowledge and push the boundaries of what is possible. With leading experts from transdisciplinary fields, we are confident this event will provide a platform for insightful discussions and collaborative networking, leading the way for exciting discoveries.

Whether you are a researcher, clinician, nurse, nutritionist, pharmacist or passionate advocate, this is a unique opportunity to share expertise, learn from others, and contribute to the collective mission of improving the lives of those affected with inborn errors of metabolism.

Porto is known for its rich history, vibrant culture, local cuisine and charming streets – and of course, the Douro river and the famous vineyards.

Together, let's embark on a journey of exploration, collaboration, and innovation as we discover new horizons in the fascinating world of metabolism.

We look forward to welcoming you for an unforgettable experience.

See you in Porto = Vemo-nos no Porto
Vê-mu-nus nu Pô-r-tu

Dulce Quelhas
President
